Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 14 April 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 13, 15-20, 29, and 30 are rejected under 35 U.S.C. 102(b) as being anticipated by Fugman #5,651,484. Fugman, as best seen in Figures 6, 8, and 9, discloses a vehicle attachable support bracket assembly 10, comprised of a pair of ladder receiving tubular frame assemblies 24, each frame assembly having an elongated (ladder engaging) main leg member 42, a V-shaped extension member located at an end of 42, comprised of elements 74, 76, 78, upper arm members 82, 50, located at a second end of 42, and a retaining member assembly comprised of horizontally extending elements 30, 34, which extend from arm member 50.

Allowable Subject Matter

Claims 21-28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The primary reason for the allowable subject matter of claim 21 is the inclusion of the main leg member having a curved lower end forming a threaded cusp that threadably receives the extension member, and the main leg member also having an upper end with an eye affixed thereto. The prior art of record fails to teach or suggest the claimed features absent the applicant's own disclosure.

Response to Arguments

Applicant's arguments filed in the Amendment of 4-14-05 have been fully considered but they are not persuasive. At the outset, it is the patentability of the support bracket and not its relationship to unclaimed elements such as the ATV that is to be determined. The applicant argues repeatedly how the frame assembly is removably attachable to the ATV. There is no ATV being claimed. If the applicant is relying upon a particular structure of the bracket relative to the ATV, then it is strongly suggested that the applicant recite the combination of the ATV and bracket. The intended vehicle of preference of Fugman is in no way a disqualifying factor in use of the reference and the vehicle support bracket that is disclosed therein. With respect to claim 30, any object can be designed and configured for specific purpose. However, if there is some special structural relationship between the designed object and an accompanying element, then it can reasonably assumed that both the object and the element are necessary to achieve that relationship. As such with the instant invention, it appears that a particular ATV is need for use with the bracket, and that the ATV should be positively recited. Please also note that there are many makes and sizes of ATV's, and that the applicant can't reasonably assume that the instant invention can be used with every single one, especially when there is no written disclosure not evidence to that effect. Absent additional structural limitations of the bracket, the rejection is deemed proper.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

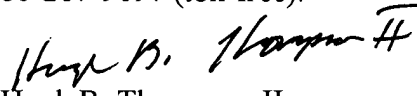

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
